

ABSTRACT OF THE DISCLOSURE:

~~The invention relates to a~~ A method of producing a progressive spectacle glass ~~comprising the steps of~~ by defining an ordering value for the average use value in the far reference point of the progressive spectacle glass, calculating the progressive spectacle glass while taking into account a calculation value of the average use value in the far reference point, the calculation value having a negative desired refraction deviation between 0.03 dpt and 0.2 dpt with respect to the ordering value in the far reference point, and producing the calculated progressive spectacle glass.

~~The invention also relates to a corresponding spectacle glass.~~
